

CSE 11

Accelerated Intro to Programming

Lecture 26

Greg Miranda, Spring 2021

Announcements

- Quiz 26 due Wednesday (June 2nd) @ 8am
- PA8 due tonight @ 11:59pm
- Survey 9 due Friday @ 11:59pm
- Exam 2 → *no class on Friday*
 - Released tomorrow @ 9pm – Sunday @ 11:59pm
 - Similar to Exam 1 → *video → piazza*
- Monday – Holiday
 - No class → *picture id + your face*

Equality

- ==
- checkExpect(_____ , _____)
- .equals(_____)

More Equality

- `Arrays.equals(____)`

instanceof

- <name> instanceof <type>
 - Where <type> could be a class or interface
- What instanceof does
 - is it takes a value and a class and it checks if that values class is below the given class in the class hierarchy
 - returns true if it is
 - returns false if it's not

Casting

```
class A {}
```

```
class C extends A {}
```

```
A aValue = new C();
```

```
C cValue = (C) aValue;
```

toString()

- It's often useful for us to define our own toString method on classes that we make if we want to be able to see their output
- The default toString isn't really helpful as it only shows the name of the class with the reference in it
- It's usually really helpful to be able to print out the contents of a class
